My Bathroom Ninja's Powerful One Drop is Often Imitated But Never Duplicated!

Oh the joy of copycat products. What a nuisance! These guys don't even understand a problem fully but still throw something out there that "kinda works like" My Bathroom Ninja.

"So what's wrong with them?" you ask. Good question, let's take them apart and find out:

- Many of these copycats rely on making a thin trampoline skin of chemical fragrance to "bounce" the odors back down from the surface. This is ultimately doomed to fail because any disturbance in the surface of the water breaks the skin releasing odor. Now that's a problem, but they simply say, "Use More."
- On television, the Myth Busters program did a demonstration of what is called the "Aer Effect" from the toilet. This is a fancy word for the spray that a toilet churns up during a flush cycle. The water in the bowl whips around violently, churning to get things moving go down the pipe. And while this is happening, there is absolutely no hope of maintaining chemical skin.
- The copycats product makers know about the Aerosol Effect of your toilet too, they simply hope you don't.
- The fragrance they add is hopefully strong enough to cover the odor that escapes, but not enough to make you nauseous. Just like the perfumes and sprays only using the icky toilet water to deliver the scent. Now that is just gross!
- The fragrances chosen are generally reputed mild sedatives, so even when the stink does out, you hopefully won't care. Now that's planning for you.
- They are more expensive for an obviously inferior product.

I think that wraps that up. Stick with the quality of My Bathroom Ninja and you won't go wrong.

Get the Original Defender against odor Here!

But if you have questions feel free to ask us right on our webform in Company Info.

My Bathroom Ninja is simply the best at destroying odor for one simple reason,

We Metabolize it in the Bowl!

The Powerful One Drop actually eats the odor causing chemicals in the bowl.

To fight odor you must think like a Ninja and truly know your enemy. You must meet it's own territory and defeat it directly. That's exactly what My Bathroom Ninja does.

To explain the toilet odor, we must know what causes it. Most odors are actually caused by a few specific chemicals found in the food we eat. Most notable is Sulfur, this is the actual source of the "rotten egg" smell. Although only a small amount passes through us, a little goes a very long way in the destruction of the bathroom airspace.

These truly powerful foes in their own territory must be fought with an equally powerful one that can turn the whole bowl into an odor targeting weapon of mass destruction with just a few drops. A concentrate that actually mixes with the water in the bowl to react and eat all of those odor causing agents. My Bathroom Ninja is your ally.

On television, the Myth Busters program did a demonstration of what is called the "Aer Effect" from the toilet. This is a fancy word for the spray that a toilet churns up during a flush cycle. The water in the bowl whips around violently, churning to get things moving before going down the pipe. The only solution is to lock the odor causing agent in molecular mortal combat before and during the churn and final flush away. The agitated bowl water actually enhances the power of My Bathroom Ninja by further mixing the combatants.

By combining modern scientific chemistry and ancient herbal lore, My Bathroom Ninja is truly the best solution for stopping devastating odor at the source in the bowl!

Employ My Bathroom Ninja now to Protect Your Private Throne!
